Office Action Summary

Application No.

10/606,315

Applicant(s)

STONE, ROGER

Examiner

Flemming Saether

Art Unit

3677

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 102

Claims 1, 2, 4 and 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Rückert. In the embodiment seen in Fig. 1, Rückert discloses a connector comprising: a first body/body (combined 7 and 10) comprising a bearing surface (11, 14) for engagement with a structural part (18 in combination with 9), a member formed as a stop (15) extending partially about an outer circumference and having a substantially annular form (since it conforms with the annular form of the outer circumference, see Fig. 1) which inherently would overlap a structural part (18) for preventing relative rotation with the structural part and, left-hand threads (25) and; a second body/bushing for engagement with a second structural part (23) comprising threads for engagement with the threads of the first body/body, a bore (5) having a surface feature (3) for engaging a threaded fastener (6). The second body/bushing includes symmetrical cooperating surfaces which are capable of engagement by a fastener. In operation the turning of the fastener axially displaces the second body/bushing relative to the first body/body to determine an axial position.

Claim Rejections - 35 USC § 103

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rückert as applied to claims 1 and 2 above, and further in view of Ozawa (US 6,779,957). Rückert does not disclose the surface feature to be sacrificial threads. Ozawa discloses a connector of a type similar to that of Rückert but, discloses the surface feature to be sacrificial threads (11) of a same material and thus same hardness

Art Unit: 3677

as the threads (8) of a fastener. At the time the invention was made, it would have been obvious for one of ordinary skill in the art to form the surface feature of Rückert as sacrificial threads as disclosed Ozawa because the sacrificial threads would provide for a more secure connection between the fastener and second body/bushing preventing inadvertent separation of the fastener.

Response to Remarks

Applicant amends the claims to include a stop having an at least partially annular form extending from a circumference of the first body and contends that such a structure defines over Rückert. In response, while the examiner concedes that Rückert does not teach the structure of the stop as it is disclosed, the Rückert reference does however reads on the stop as it claimed for the reasons as set for the in the above rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Flemming Saether whose telephone number is 571-272-7071. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
